The United States and Russia are on a dangerous collision course. Both countries are modernizing their nuclear arsenals and developing new weapons systems that could make nuclear war more likely. In this deeply researched and alarming book, investigative journalist David E. Sanger reveals the hidden history of the U.S.-Russia nuclear standoff and shows how close we have come to nuclear war in the past.

Sanger argues that the risks of nuclear war are greater today than at any time since the Cold War. The United States and Russia have both withdrawn from key arms control treaties, and there is a growing mistrust between the two countries. In addition, new technologies, such as artificial intelligence and cyberwarfare, are making nuclear war more possible and more difficult to control.

Sanger concludes by calling for urgent action to reduce the risks of nuclear war. He proposes a number of steps that the United States and Russia can take, including:

- Reviving arms control treaties
- Building trust between the two countries
- Developing new technologies to reduce the risks of nuclear war

"How Our Shadow War With Russia Could Spiral Into Nuclear Catastrophe" is a must-read for anyone who is concerned about the future of the world. Sanger's deeply researched and alarming book provides a wake-up call to the dangers of nuclear war and the urgent need to take action to reduce these risks.

David E. Sanger is a national security correspondent for The New York Times. He is a Pulitzer Prize winner and the author of several books on national security, including "The Inheritance: The World Obama Confronts and the Challenges to American Power."

Praise for "How Our Shadow War With Russia Could Spiral Into Nuclear Catastrophe"

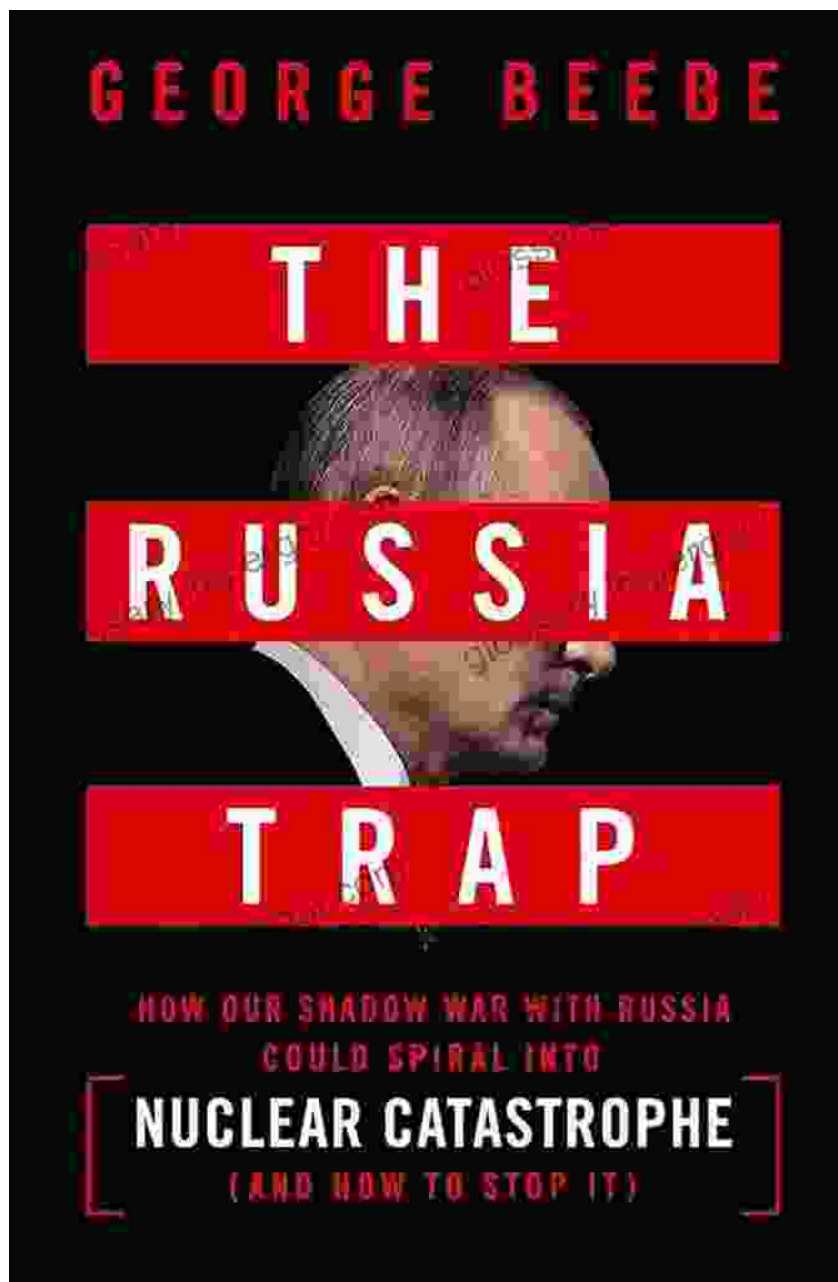

"A chilling and essential book. Sanger shows us how close we have come to nuclear war in the past, and how the risks are even greater today. This is a must-read for anyone who is concerned about the future of the world." —

Bob Woodward, author of "Fear: Trump in the White House"

"A deeply researched and alarming book. Sanger provides a wake-up call to the dangers of nuclear war and the urgent need to take action to reduce

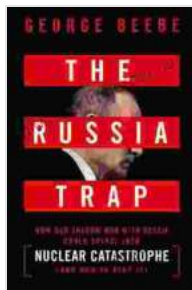

these risks." — **The New York Times**

"A must-read for anyone who cares about the future of the planet." — **The Washington Post**
