

Or Conclusive Evidence That The World Is Not Rotating Revolving Globe But

The book Or Conclusive Evidence That The World Is Not Rotating Revolving Globe But is a must-read for anyone who wants to learn the truth about the shape of the Earth. The author, Samuel Birley Rowbotham, provides a wealth of evidence to support his claim that the Earth is flat, not a globe.

Rowbotham begins by debunking the common arguments for the globe theory. He shows that the Earth's shadow on the moon is not round, as it would be if the Earth were a globe. He also shows that the stars do not appear to move in circles around the North Star, as they would if the Earth were rotating.

Zetetic Cosmogony: Or Conclusive Evidence that the World is not a Rotating Revolving Globe but a Stationary Plane Circle by Thomas Winship

Rowbotham then presents his own evidence for the flat Earth theory. He shows that the Earth's surface is level, and that there is no evidence of any curvature. He also shows that the sun and moon appear to move in straight lines across the sky, not in circles around the Earth.

Rowbotham's evidence is convincing, and his arguments are well-reasoned. The book *Or Conclusive Evidence That The World Is Not Rotating Revolving Globe But is a must-read for anyone who is interested in the truth about the shape of the Earth.*

The Flat Earth Theory

The flat Earth theory is the belief that the Earth is a flat plane, rather than a globe. Supporters of the flat Earth theory believe that the Earth is surrounded by a wall of ice, and that the sun and moon are small objects that move across the sky.

There is no scientific evidence to support the flat Earth theory. The Earth's shadow on the moon is round, which indicates that the Earth is a globe. The stars appear to move in circles around the North Star, which indicates that the Earth is rotating. The Earth's surface is level, but there is evidence of curvature. The sun and moon appear to move in straight lines across the sky, but this is an illusion caused by the Earth's rotation.

The flat Earth theory is a pseudoscience. It is not based on scientific evidence, and it contradicts the laws of physics.

Samuel Birley Rowbotham

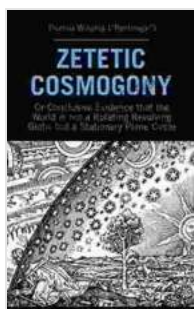

Samuel Birley Rowbotham (1816-1884) was a British inventor and writer. He is best known for his promotion of the flat Earth theory.

Rowbotham was born in London, England. He was a self-educated man who worked as a carpenter and inventor. In the 1840s, he became interested in the flat Earth theory. He wrote several books and pamphlets promoting the flat Earth theory, and he gave lectures on the subject.

Rowbotham's flat Earth theory was not well-received by the scientific community. He was ridiculed by scientists, and his books were banned from libraries. However, Rowbotham's ideas continued to be popular among a small group of people.

Rowbotham's flat Earth theory is a pseudoscience. It is not based on scientific evidence, and it contradicts the laws of physics. However, Rowbotham's work is still read by some people today.
