According to a bombshell new book, that world does exist. In "Part 1: The Real and Secretive World of Aliens and UFOs Known Only To 75 Americans," veteran investigative journalist and UFO researcher Thomas E. Daniels reveals a startling truth: that the United States government has been secretly studying alien life for decades, and that a small group of 75 Americans has been privy to this information.

Daniels' book is based on years of painstaking research, including interviews with high-level government insiders, military personnel, and scientists. He presents a compelling case that the government has been hiding the truth about aliens for decades, out of fear that the public would not be able to handle it.

So what do these 75 Americans know that the rest of us don't? According to Daniels, they know that:

- Aliens are real, and they have been visiting Earth for centuries.
- The government has been in contact with aliens since the Roswell crash in 1947.
- The aliens have shared advanced technology with the government, including anti-gravity devices and energy weapons.
- The government has been working with the aliens to develop new technologies, including a secret space program.
- The aliens are not hostile, but they are concerned about the direction that humanity is heading.

Daniels' book is a must-read for anyone who is interested in the truth about aliens and UFOs. It is a well-researched, thought-provoking, and ultimately

groundbreaking work that will change the way we think about extraterrestrial life.

In this exclusive excerpt from "Part 1," Daniels reveals the chilling truth about the government's secret deal with the aliens:

“In the aftermath of the Roswell crash, the government was faced with a dilemma. They had irrefutable proof of the existence of extraterrestrial life, but they didn't know what to do with it.

The public was not ready for the truth, and the government feared that releasing the information would cause mass panic. So they decided to keep it a secret, and they enlisted the help of the aliens to do it.

The aliens, who had been observing Earth for centuries, were aware of the government's predicament. They understood that the public was not ready for the truth, and they agreed to help the government keep it a secret.

In exchange for the government's secrecy, the aliens asked for two things: first, that the government would not interfere with their activities on Earth; and second, that the government would work with them to develop new technologies.

The government agreed to the aliens' demands, and a secret alliance was formed. The government would keep the truth

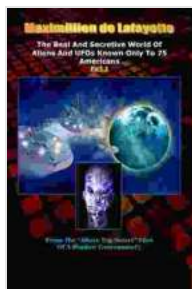

about aliens a secret, and the aliens would help the government develop new technologies.

This alliance has been in place for decades, and it has led to the development of some of the most advanced technology on Earth. But the public is still unaware of the truth, and the government is still keeping it a secret.

Why? Because the government knows that the public is not ready for the truth. They fear that releasing the information would cause mass panic, and they are not willing to take that risk.”

Daniels' book is a sobering reminder that the truth about aliens and UFOs is not always what we think it is. The government has been keeping a secret from us for decades, and it is a secret that could change the course of human history.

Are you ready for the truth? If so, then read "Part 1: The Real and Secretive World of Aliens and UFOs Known Only To 75 Americans." It is a book that will change the way you think about extraterrestrial life, and it may even change the course of human history.
