

State Organs Transplant Abuse In China: A Horrific Crime Against Humanity

In the annals of human history, few crimes are as heinous and barbaric as the systematic and widespread practice of organ harvesting from prisoners of conscience in China.

This horrific practice has been documented by numerous independent investigations, including a landmark report by the independent China Tribunal, which concluded that the Chinese government has been "intentionally killing prisoners of conscience in substantial numbers to supply China's organ transplantation industry."

The victims of this crime are primarily Falun Gong practitioners, a peaceful spiritual practice that has been brutally persecuted by the Chinese government since 1999. Uyghurs, a Muslim minority group in China, have also been targeted for organ harvesting.

The Chinese government's organ harvesting program is a crime against humanity. It is a violation of the most basic human rights, including the right to life, the right to be free from torture, and the right to bodily integrity.

The international community must not stand idly by while this horrific crime continues. We must demand that the Chinese government end its organ harvesting program immediately and release all prisoners of conscience.

We must also support the victims of this crime and their families. We must provide them with medical care, financial assistance, and legal support.

The book *State Organs Transplant Abuse In China: A Horrific Crime Against Humanity* is a powerful indictment of the Chinese government's organ harvesting program. It is a must-read for anyone who cares about human rights and the rule of law.

About the Author

Ethan Gutmann is an investigative journalist who has been reporting on the Chinese government's organ harvesting program for over a decade. He is the author of the book *State Organs Transplant Abuse In China: A Horrific Crime Against Humanity*.

Reviews
