Edited by John W. Beaver

The NATO Science and Technology Organization (STO) is a subsidiary body of the North Atlantic Treaty Organization (NATO). Its mission is to

conduct and promote scientific and technological research and development that contributes to the Alliance's security and defence posture. The STO provides a forum for member nations to collaborate on scientific and technological issues, and to share and exchange information and expertise.

This book is a collection of papers presented at a STO conference held in Ottawa, Canada, in October 2018. The conference brought together experts from academia, industry, and government to discuss the current state of NATO science and technology, and to identify future challenges and opportunities. The papers in this book cover a wide range of topics, including:

- The future of NATO science and technology
- The role of NATO science and technology in addressing emerging security challenges
- The importance of international collaboration in NATO science and technology
- The challenges and opportunities of NATO science and technology

This book is a valuable resource for anyone interested in the future of NATO science and technology. It provides a comprehensive overview of the current state of NATO science and technology, and it identifies future challenges and opportunities. The book is also a valuable resource for anyone interested in the role of science and technology in addressing emerging security challenges.

Table of Contents

- 1.
2. The Future of NATO Science and Technology
3. The Role of NATO Science and Technology in Addressing Emerging Security Challenges
4. The Importance of International Collaboration in NATO Science and Technology
5. The Challenges and Opportunities of NATO Science and Technology
- 6.
